
2-4 OCTOBER 2008: HUMSEC 3rd ANNUAL CONFERENCE

Each year the network organises a public conference that will act as a major forum for the consortium. Aim of the conference is to assess the state of the art in one of three main topic identified under the project umbrella, promote research cooperation and discussion of results and suggest policy recommendations. In the wider framework of the network the conferences will also contribute to the discussion of the results from the other areas and mutually link their research efforts.
